Summary

My research develops secure and incentive-compatible mechanisms for decentralized systems, with a particular focus on censorship resistance, transaction ordering, and transaction fee mechanism design on blockchains. I study how cryptographic tools and algorithmic game theory can be combined to address real-world challenges in decentralized finance and distributed protocol design. I have had the privilege to work with wonderful collaborators from Ethereum Research, Flashbots, Category Labs and Common Prefix.

Education

- **Ph.D. in Computer Science.** Duke University. Advisors: *Kartik Nayak* and *Fan Zhang* 2021 – 2026
  Thesis: *Security of Blockchains with Strategic Entities*
- **Dual B.Tech./M.Tech. in Computer Science and Engineering.** IIT Delhi 2014 – 2019

Positions

- **Postdoctoral Researcher.** University of Michigan. Host: *Ke Wu* 2026 –
- **Research Intern.** Flashbots. With *Jonathan Passerat-Palmbach* 2023
- **Senior Software Developer.** Samsung Research Institute, Bangalore. Camera systems 2019 – 2021
